

6th HKU-PASTEUR IMMUNOLOGY COURSE

FOR RESEARCH POSTGRADUATE STUDENTS

17 - 29 November 2013

HKU-Pasteur Research Pole, Hong Kong

香港大學 - 巴斯德研究中心
HKU-Pasteur Research Pole

THE UNIVERSITY OF HONG KONG
LI KA SHING FACULTY OF MEDICINE
香港大學李嘉誠醫學院

DIRECTORS:

Roberto BRUZZONE, HKU-Pasteur Research Pole
Jean-Marc CAVAILLON, Institut Pasteur

LECTURERS:

Soman ABRAHAM Singapore
Subhra K BISWAS Singapore
Roberto BRUZZONE Hong Kong
Jean-Marc CAVAILLON France
Mathias CHAMAILLARD France
James DI SANTO France
Takashi FUJITA Japan
Florent GINHOUX Singapore
Robert HANCOCK Canada
Pierre MIOSSEC France
Paul B MORGAN UK
Iris PANG Hong Kong
Satoshi UEMATSU Japan
Luis ULLOA USA
Arturo ZYCHLINSKY Germany

TOPICS:

The course will focus on **innate immunity and inflammation**, two areas of research that are being explored with a novel array of techniques and approaches to understand their role in both organism homeostasis and as potential areas of therapeutic interventions. The course will emphasize an integrated approach to combat infectious diseases by presenting an in-depth review of the repertoire of effector cells, such as mast cells, natural killer cells, dendritic cells, neutrophils and macrophages, and of the signaling mechanisms involved in their response to any types of insults (infectious or sterile).

FREE REGISTRATION:

Candidates are invited to download course and travel application forms at www.hkupasteur.hku.hk. Please return all completed forms, including two letters of recommendation to hku-pasteur@hku.hk. Accommodation (on sharing twin basis) and food (canteen-style) will be provided. Travel fellowships (up to 5) will be awarded to the best non-Hong Kong residents. The course (MMPH6174) is included in the coursework curriculum for research postgraduate studies of the University of Hong Kong.

DEADLINE FOR APPLICATIONS:

September 13, 2013.

FOR MORE INFORMATION, PLEASE CONTACT:

Anne LI at +852 2831 5516 or hku-pasteur@hku.hk. Check www.hkupasteur.hku.hk for programme updates.

Elie Metchnikoff (1845 - 1916) Nobel Prize in Medicine 1908 for his work on phagocytosis
